A year-end message for all PROJECT MANAGERS

2022 Points and Pointers!

Here's thanking customers for loyal support in 2021 – and a friendly reminder to send in equipment¹ for repair and service as early as possible!

We don't need old Chinese proverb to tell us:

"Reworks cost ten times more than one-time good work with adjusted instrument!"

But we may need an African proverb to tell us:

"Only fools test river depth with both feet. Wise men measure it with Allen kit"

Measure in picture with the smart Leica BLK3D for faster, accurate results

A calibrated stereo camera, measurement sensors, software, and on device edge detection capabilities make in-picture measurements with professional-grade accuracy. Every image is a complete 3D measurement record. Use in design, project progress and as-builts!

Shallow water hydrographic surveying with the Ohmex SonarMite

This economical, single beam echo sounder provides a wide range of solutions for <70 m surveys. All models offer a range of interchangeable smart transducers. Interface Tablet PCs, PDA or Windows OS systems for integration with new WinSTRUMENT technologies.

The new TroxTrolley for convenience and compliance

Avoid back strain and accidents like those which cost contractors R3mn in wrecked densometers in recent months. Complete with warning signage and the mandatory red flag. 100% visibility by roller operators and traffic. Matches all densometer makes and models.

The CIAC Smart Feeder will catapult your aqua or terra farm into the realm of 4IR

Packed with AI, these multi-function feeders ensure optimal growth for fins or feet in stand-alone or total automation projects. Android-friendly and remote access features spell out peace of mind in so many demanding livestock situations.

Now remote training option in radiation safety and technology

Qualify for RPO and ARPO appointment though *Allen* remote training courses honed to SAHPRA requirements. SHEQ courses for flow in harbour dredging, mines PGNAA cross-belt analysis, ECD in gas chromatography besides the ever-popular densometer courses.

Allen's will be closed 17th December until 7th January. Be free to use support lines:

Leica	082 381 6828	Topcon, Ruide, South	083 267 6418
Troxler	083 564 0613	Garmin GPS Support	011 791 0204
Geo-Fennel	082 339 3366	Spectra Lasers	082 569 6174
GeoMax	082 381 6828	Sitech	082 569 6174
Trimble Help Desk	086 099 9007	HP Help Desk	086 000 1030

From the staff at Allen's, all the best in positioning, and a relaxing and safe break!

Dave Allen

¹ Calibration certificates are issued for land survey equipment. Remember to include tribrach plummets, prism pole bubbles, spirit & electronic levels, breathalyzers, hardness testers, metal holiday testers. Add to your ISO 9001 standing orders.
