

## New Product Announcement

12 August 2011

**Montana 600**

**Montana 650**

The Montana series features a large bright 4" (10 cm) colour, dual orientation display with a built-in basemap, and a high-sensitivity GPS receiver with HotFix. Both models come standard with a microSD card slot, 3-axis compass and barometric altimeter. Building on the Montana 600 feature set, the Montana 650 adds a 5-megapixel, autofocus digital camera that automatically geo-tags pictures allowing users to mark, remember and navigate back to that exact spot in the future. Connect the Montana 650 to a computer via USB, log on to myGarmin (<https://my.Garmin.com>) and any photos will be automatically detected. The intuitive myGarmin site makes it simple to select, upload and store photos. You can also plan and review the location of your latest adventure by using Garmin's free BaseCamp software (<http://www.garmin.com/basecamp>). Montana supports Garmap, Garmin City Navigator & BlueChart g2 mapping. Receive text-to-speech driving directions when using a compatible map with the optional automotive mount which includes a built-in speaker.
